Dear Customers and Partners,

Hereby we are pleased to inform you that, as of the April 7th, a new feature will be available on the Luxtrust Mobile application.

After installing the latest version of their application, users will be able to perform the restore of their application on their new smartphone via the usage of iCloud/Google backup.

This function will bring these advantages:

- Allow people to install the LuxTrust Mobile App on their new phone without the need of the LuxTrust Token or CSD
- The LuxTrust application generates automatically the backup file
- The backup file does not contain any certificate or identity information.
- LuxTrust encrypts the file
- The file is automatically included in the backup of the smartphone ( iCloud or Google backup)

Previous association flows are still available (GO6, VTS to VTS, Security Codes,...)

Should you need further information, do not hesitate to contact us [esm@luxtrust.lu](mailto:esm@luxtrust.lu)

Best regards,  
Your LuxTrust Team
