ARVAL EASY TRAVEL

No longer any need to choose between electric and conventional vehicles!

ARVAL EASY TRAVEL: Meeting all your needs

Arval Easy Travel gives you the option of occasionally changing your main electric vehicle for a conventional motor vehicle that may be better suited to your occasional mobility needs. A vehicle suitable for going on holiday, for example, or any other motor vehicle to meet your needs at a given time.

What are the benefits of ARVAL EASY TRAVEL?

This option offers several benefits:

- **Flexibility** : ideal for holidays or any other mobility needs involving long journeys. Delivery of the conventional motor vehicle is available under conditions*
- **Transparency** : the charges and terms and conditions of use are clearly defined.
- **Ease of use** : no need to look for a charging station on the way.
- **Positive impact on the environment** : many drivers are tempted to opt for an electric vehicle, but end up ordering a conventional motor vehicle so that they can travel greater distances if necessary.
This product allows you to drive an electric car all year round and have access to a conventional motor vehicle when necessary.
