The Terms and Conditions in the Base Prospectus provide for early redemption on the occurrence of Force Majeure, Illegality and certain other events affecting the Underlying and/or the hedge, whereupon the Calculation Agent shall calculate the fair market value of each Certificate less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements, all as determined by the Calculation Agent in its sole and absolute discretion. Payment will be made in such manner as shall be notified to the Certificate holders in accordance with the Condition 10 of the Base Prospectus.

#### Issuer Risk and Guarantor Risk:

- Certificates are unsecured obligations: The Certificates retention of value is dependent not only on the development of the value of the underlying, but also the creditworthiness of the Issuer and the Guarantor, which may change over the term of the structured product. The Certificates are direct unsecured obligations of the Issuer and will rank pari passu with all other direct unsecured obligations of the Issuer. The obligations of the Guarantor under the guarantee are unsecured obligations of the Guarantor and will rank pari passu with all its other present and future unsecured obligations, subject as may from time to time be mandatory under French law.
- Possible illiquidity of the Certificates in the secondary market: It is not possible to predict the price at which Certificates will trade in the secondary market.
- The trading market for the Certificates may be volatile and may be adversely impacted by many events.
- An active trading market for the Certificates may not develop.
- The Certificates may be redeemed prior to maturity.
- A Certificate holder's actual yield on the Certificates may be reduced from the stated yield by transaction costs.
- A Certificate holder's effective yield on the Certificates may be diminished by the tax impact on that Certificate holder's of its investment in the Certificates.
- In the secondary market a bid/ask spread will generally apply.
